

TITAN 400D

Technical Parameters

Total weight without additional equipment or accessories	16800 kgs
Press power	420000 kgf
Ejection power	51000 kgf
Max. capacity *nominal brick	6 strokes / min
Filling depth	310 mm
Max. operating pressure	297 bar (29,7 MPa)
Heaviest component during assembly – complete press body	1350 kgs
Total connected electric load at 50 Hz	37 kW
Cooling water consumption	Temperature, 25 ° C, 2,0 - 4,0 m3 / h
Compressed air consumption	5 bar (0,5 MPa), 30 l / min
Hydraulic oil for one oil fill, approx.	720 l

Maximum performance nominal bricks.
